TECHNICAL SKILLS

Languages: C++, Java, JavaScript, SQL, HTML, CSS

Frameworks & Runtime: React, Angular, Node.js, Express.js, Spring Boot

Databases & APIs: PostgreSQL, JPQL, RESTful APIs, CRUD operations

Build & Development Tools: Git, GitHub, Maven, npm, CMake

Platforms & Delivery: Docker, Kubernetes, Linux, Jenkins, GitHub Actions

Testing & Engineering: Google Test, unit testing, object-oriented programming, RAII, concurrency, thread-safe logging, Agile/Scrum

Security: JWT, bcrypt, role-based access control

PROJECTS

SmartCard | Full-Stack Web Application

React, JavaScript, Node.js, Express.js, PostgreSQL

- Developed a full-stack flashcard application using React and JavaScript, with React Router for client-side routing and the Context API for centralized state management.
- Built RESTful APIs using Node.js and Express.js, integrating a PostgreSQL relational database to support CRUD operations and persistent data storage.
- Implemented authentication and authorization using JSON Web Tokens (JWT), with bcrypt password hashing to protect user credentials.

Project Management Dashboard | Full-Stack Web Application

Java, Spring Boot, Angular, PostgreSQL

- Collaborated on a four-person Agile development team to build a full-stack dashboard for managing users, projects, teams, companies, and announcements.
- Implemented role-based access control (RBAC) and Angular route guards to enforce authorization, restrict administrative functions, and support team-specific access.
- Developed RESTful backend services using Java and Spring Boot, with JPQL database queries, Lombok, MapStruct entity mapping, and GitHub-based continuous integration (CI).

PROFESSIONAL EXPERIENCE

Oracle | Datacenter Technician

Abilene, TX | June 2026 - Present

- Diagnosed and repaired NIC/MPO and Ethernet link faults by cleaning/reseating connections, swapping optics, validating light levels, and correcting cable mislabels.
- Performed link-flap and BER troubleshooting between leaf/spine and GPU devices, then verified stability through LVV and CPV validation.
- Investigated switch/BMC power and management-connectivity failures; when physical remediation did not restore service, escalated to proper channels.

PROFESSIONAL EXPERIENCE (CONTINUED)

Lockheed Martin | Technical Intelligence Analyst (Internship)

Jan 2026 - April 2026

- Conducted in-depth technical research and data analysis on hypersonic glide body technologies, satellite bus architectures, and telemetry anomaly detection patterns.
- Synthesized findings into actionable engineering assessments that directly informed leadership decisions on project feasibility and risk mitigation.

Bridgestone Americas | Senior Learning Data Analyst

Nashville, TN | June 2024 - Jan 2025

- Increased proper leadership course enrollment by 20% company-wide within 2 weeks by creating a detailed weekly report using MS Excel and Alteryx, that allowed field leaders to track enrollments, completions, and assign courses more effectively.
- Increased teammates tire training completion rates 15% in a month by creating a report that showed the low completion rates. This allowed leadership to have data that could help them to identify and address the issue of low sales for company branded tires.

MILITARY EXPERIENCE

US Army | Cavalry Scout Section Leader

Ft. Hood, TX | June 2017 - Nov 2023

- Led a 12-member team, executing strategic plans, training personnel, and driving professional growth. Managed operations, evaluations, and mentorship.
- Responsible and signed for more than $12 million worth of equipment to include 3 Stryker vehicles and all assigned basic equipment, ASIP radios, JBC-P, and weapons
- Conducted monthly reviews with soldiers to help develop them professionally by addressing any performance issues, acknowledgement of exceeded standards, and career guidance.

EDUCATION & CERTIFICATES

- Louisiana State University of Alexandria Online Bachelors, Computer Science | June 2026 - Present
- Become a C++ Pro: Ultimate Developer Guide (Coursera) | Dec 2025 - Mar 2026
- Cook Systems FastTrack Java Program | April 2025 - May 2025
- Galvanize Coding Bootcamp (PERN) | Oct 2023 - Feb 2024
